SRF Slow Memory

Performance Urethanes for high-tech comfort and cushioning support

94 SOFT Slow Memory

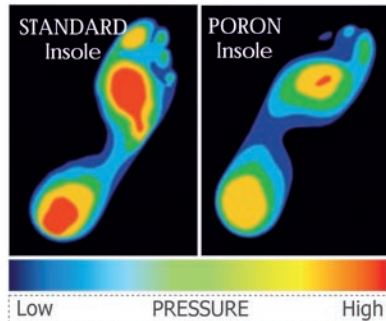

The latest generation of PORON provides the ultimate in comfort. The new Slow-Recovery PORON is so flexible it moulds to the contours of your feet. Walking has never been such a joy.

92 VERY SOFT Slow Memory

Poron 92 is a contouring material for tongue, collar and ankle cushion or for gloves. This material will continue to return to its original shape when not in use. Comfort is ensured through the life of the product.

Unique custom Contouring
Controlled Energy return
Excellent Impact Absorption
Open Cell Breathable
Antifungal

Insoles made with PORON urethane material form permeable layers that draw water vapour and perspiration away from the foot, helping to keep shoes and feet dry, while reducing foot odour.

Produced under
ISO 9002

MEDICAL

PORON® Medical™ Urethanes deliver lasting comfort, support, and compression set resistance. Don't be misled PORON® Medical Urethanes set standard against which all other material are judged.

Comfort & Support

Antishock and Comfort for the life of the shoe!
